Valentines BATTLESHIP!

SUPPLIES:

*Candy Hearts
*100's chart or any number chart!
The students are placed in pairs. Without letting their partner see, each student puts 10 candy hearts on different numbers on their 100's chart {students are sitting back to back}. Player 1 tells player 2 a number. If player 2 has that number covered by a candy heart, he/she has to give that heart to Player 1 (they can say "hit"). If it is not a number covered, the next player takes a turn (they can say "miss"). The first player to get all of the candy hearts and clear the other players' 100's chart is the winner.

EXTENSIONS:

Have the students use words like 10 more or 10 less when asking their partner. (ex: do you have a candy heart on the number that is 10 more than 24?- the actual number is 34)
Have the students use words like 1 more or 1 less when asking their partner. (ex: do you have a candy heart on the number that is 1 less that 99?- actual number is 98)
